

# LUXER1 LED DOME LIGHT INSTALLATION INSTRUCTION.

# DIY

(Based on the installation instruction for TOYOTA VITZ)

**Attention** Before starting the installation; turn off the dome light.

Wedge Base

Bayonet Base

Festoon Bulb

There are three different bulb types in the dome light. For all three bulb types, follow the installation instruction here.

Insert a flathead screwdriver at the edge of the dome light lens and remove the lens.  
Be careful not to damage the lens or the base.

Remove the standard dome light bulb.

CAUTION : Do not touch the standard bulb right after use (when it's hot).

Attach the LED dome light socket and turn the light switch on to check the LED dome light

Note: If the light does not turn on, switch polarity of the connector.

Loop the cables/harness neatly behind the lamp, and secure the LED dome light using the adhesive tape.

Install the lens and check the light again.

NOTE: Standard dome light may vary depending on the year, grade or model of your car and whether the car comes with or without a sunroof.
