

# LUXER 1 LED LIGHT INSTALLATION INSTRUCTIONS

# D.I.Y.

**Attention** Before starting the installation; turn off the light.

## Easy Installation

### Installation Procedure

#### Adaptor attachment

There are three different types of standard light bulbs. For all three bulb types, follow this installation instruction.

1

Insert a flat head screw driver next to the light lens and remove the lens. Be careful not to damage the lens and the base.

2

Remove the standard light bulb.

CAUTION: Do not touch the standard bulb light after use (it may be hot).

3

Attach the universal LED light's socket and turn the light switch on to check the universal LED light

Note: If the light does not turn on, switch the connector and try again.

4

Loop the cables/harness neatly behind the light, and secure the universal LED light using the adhesive tape.

5

Install the lens and check the light again.

NOTE: standard light vary depending on the year, make or model of your car and vehicle.
